

OrthoNow Referrals

UNC Orthopaedics' Urgent Care provides walk-in orthopaedic care for people who can be transported by regular automobile and not by ambulance or stretcher. Care is provided for strains and sprains, fractures/possible fractures, sports-related injuries, cast problems, and injuries that do not require stitches.

For head trauma, open fractures, spine injuries, or lacerations requiring stitches, please visit your nearest Emergency Department. We do not provide pain management prescription refills. For chronic or long-standing conditions, or orthopaedic second opinions please call to schedule an appointment with a UNC orthopaedic provider by calling 984.974.5700.

Please bring any x-rays, MRIs, or other imaging studies that have already been completed with you so the studies do not have to be repeated.
